Learn. Get Certified. Stay Ahead

Overview

Risk management is an important skill that can be applied to a wide variety of projects. In an era of downsizing, consolidation, shrinking budgets, increasing technological sophistication, and shorter development times, risk management can provide valuable insights to help key project personnel plan for risks, alert them of potential risk issues, analyse these issues, and develop, implement, and monitor plans to address the issues long before the issues surface and adversely affect project cost, performance, and schedule.

The course offers comprehensive study guides for all the chapters with examples that explain and illustrate the concepts for the benefit of the student. The concepts are explained in simple language using time-tested and proven training methodology, making it easy to understand even the complex topics.

This course is aligned with the concepts of Risk Management as defined by Project Management Institute (PMI®) and is a great way to prepare for PMI Risk Management Professional (PMI-RMP®) exam.

Certification

Applicants will be awarded the PMI Risk Management Professional (PMI-RMP®) credential by PMI upon meeting the experience and education requirements, and passing the PMI-RMP® examination, which is a 170-question, multiple-choice test. The certification exam fee is not included in the course fee and the students need to schedule their exam with PMI. Visit PMI.org for more information about PMI® and the CAPM® credential.

Who should attend?

Any one who is looking to sharpen their project management skills and showcase their specialized expertise in risk management, this course is meant for them.

Prerequisite

- Secondary degree (high school diploma, associate's degree, or the global equivalent)
